PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in cloud hosting, CI/CD automation, containerization, and infrastructure management. Successfully hosted and managed **5+ websites on AWS and Azure**, with strong skills in EC2, Lambda, Virtual Machines, and CloudWatch. Experienced in Docker, Kubernetes, GitLab, Jenkins, Terraform, Ansible, and Hashicorp Vault. Also bring 5+ years of frontend static website development experience with **50+ completed projects**, including multiple live client deployments.

CORE SKILLS

- **Cloud Platforms:** AWS (EC2, Lambda, CloudWatch), Azure (VMs)
- **DevOps & Automation:** Jenkins, GitLab CI/CD, Terraform, Ansible
- **Security & Secrets Management:** Hashicorp Vault
- **Containers & Orchestration:** Docker, Kubernetes
- **Version Control:** Git & GitLab
- **Monitoring & Logging:** AWS CloudWatch
- **Web Development:** Static websites, HTML, CSS, JS (50+ projects delivered)

EXPERIENCE

DevOps & Cloud Engineer (Freelance / Project-Based)

2020 – Present

- Hosted and managed **5+ production websites** on AWS & Azure.
- Configured **AWS EC2, Lambda**, S3, IAM, Security Groups, Route53.
- Managed **Azure Virtual Machines** for hosting applications.
- Built automated CI/CD pipelines using **GitLab and Jenkins**.
- Implemented **Infrastructure as Code** using **Terraform**.
- Automated configuration management using **Ansible**.

1

- Setup and managed **Docker** containers and basic **Kubernetes** clusters.
- Configured **CloudWatch** alarms and monitoring dashboards.
- Ensured secure secret management using **Hashicorp Vault**.
- Supported deployment, monitoring, and maintenance of live client projects.

Frontend / Static Website Developer

2018 – Present

- Built **50+ static websites**, including business sites, landing pages, and portfolio sites.
- Delivered responsive UI using HTML, CSS, JS, and frameworks.
- Collaborated with clients and deployed multiple live projects.

EDUCATION

Bachelor of Engineering (B.E.) – Electrical Engineering

GTU ,ahemdabad
CGPA: 7.33 (First Distinction)

PROJECT HIGHLIGHTS

- **AWS Website Hosting (WordPress/Static):** EC2-based hosting, load balancing, backups.
- **Azure VM Hosting:** Production hosting with security hardening.
- **Terraform Modules:** Automated infrastructure for EC2 + VPC.
- **Jenkins CI/CD:** Automated deployments from GitHub/GitLab.
- **Dockerized Applications:** Built and deployed containerized apps.
- **CloudWatch Monitoring Setup:** Custom metrics & alerts.

PERSONAL ATTRIBUTES

- Strong problem-solving
- Fast learner & self-driven
- Good communication & client-handling skills
